## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-7, 9-13, 16, 19 and 21-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-17 of U.S. Patent No. 6,698,586 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims either include or suggest all of the subject matter set forth in the present claims, including that about a base, a lid, a seating area, a hub, a continuously cylindrical, unmovable hub sidewall having a 1/16 inch height, a flexible locking finger adapted to be disposed over the disc-shaped item, a finger height of .01 inches and being of 1/4 to 1/12 of the height of the side wall, except for claim 22 which calls for the hub to be tubular and open at a bottom. However, official notice is taken that it is known to make a hub with an open bottom, which would require less material than a solid hub. Accordingly, it would have been

Art Unit: 3728

obvious in view of this to have made the hub of patent claims 12-17 with an open bottom.

***Response to Arguments***

3. Applicant's arguments, see pages 7 and 8 of remarks filed June 07, 2005, with respect to 102(e), 102(b) and 103 (a) have been fully considered and are persuasive. The rejection under 102 (e), 102(b) and 103 (a) of claims 1-7, 9-13, 16, 19 and 21-24 has been withdrawn.
